

Navigator

Navigator Curriculum - Formal Curriculum

- A formal academic curriculum for students closer to age related expectations.
- Aspirational and challenging.
- It is typically for our children with high functioning autism or moderate learning difficulties.
- A broad and balanced secondary curriculum.
- Leads to good GCSE, Level 1 and Level 2 outcomes.
- Subjects become more specialist.

8.1 - Navigator Curriculum – Long Term Plan

	Knowledge					
Year 8.1	<p>Topic: (1) Health & Lifestyle B2.1 (2) The Periodic Table C2.1</p> <p>Key Questions: What do we need to maintain a healthy lifestyle? What does the periodic table show?</p> <p>Health & Lifestyle B2.1</p> <ul style="list-style-type: none"> • Name some nutrients in a given diet. • Name the nutrients required by the human body. • State that food can be tested for starch, lipids, sugar, and protein. • State that food tests show colour changes. • State one potential problem for someone 	<p>Topic: (1) Electricity P2.1</p> <p>Key Questions: How is electricity generated and what measurements can be taken in a circuit?</p> <p>Electricity P2.1</p> <ul style="list-style-type: none"> • Describe how to charge insulators. • State the two types of charge. • State what surrounds charged objects. • Name what flows in a circuit. • Name the equipment used to measure current. • Name the equipment used to measure current. 	<p>Topic: (1) Ecosystem processes B2.2</p> <p>Key Questions: What is and ecosystem and what processes take place in an ecosystem?</p> <p>Ecosystem processes B2.2</p> <ul style="list-style-type: none"> • State where photosynthesis occurs in a plant • State the products of photosynthesis. • Carry out an experiment to test for the presence of starch in a leaf. • Name the main structures of a leaf. • State the function of the chloroplasts in a leaf. 	<p>Topic: (1) Separating Techniques C2.2 (2) Energy P2.2</p> <p>Key Questions: How can we separate various mixtures? What is energy and how is it transferred?</p> <p>Separating Techniques C2.2</p> <ul style="list-style-type: none"> • State that parts of mixtures are not joined together. • State that different substances in mixtures have their own melting points. • Choose a simple separation technique with help. • Identify a solvent, solute, and solution in a given scenario. 	<p>Topic: (1) Adaptation & Inheritance B2.3 (2) Metals & Acids C2.3</p> <p>Key Questions: How have organisms adapted over time? What products are formed when metals react with acids?</p> <p>Adaptation & Inheritance B2.3</p> <ul style="list-style-type: none"> • State some resources that plants and animals compete for. • State what is meant by the term adaptation. • Name an environmental change. • Give a possible reason for adaptation or extinction. 	<p>Topic: (1) Motion & Pressure P2.3 (2) The earth C2.4</p> <p>Key Questions: How can we calculate the speed of an object? What are the different layers of the Earth?</p> <p>Motion & Pressure P2.3</p> <ul style="list-style-type: none"> • State the equation for speed. • Define relative motion. • Describe simply what a distance-time graph shows. • Use a distance-time graph to describe a journey qualitatively. • State two things that can affect gas pressure. • State the cause of

<p>with an unhealthy diet.</p> <ul style="list-style-type: none"> • State that different people require different amounts of energy. • Name the main parts of the digestive system • State what is meant by digestion • Label a diagram of the digestive system by identifying correct information in text • Name some enzymes used in digestion. • State where bacteria are found in the digestive system. • Name some recreational and medicinal drugs. • State one effect of a drug on health or behavior. • Name one effect of alcohol on health or behaviour • State whether alcohol affects conception and pregnancy • Name an effect of tobacco smoke on health • State whether or not tobacco smoke affects the development of a fetus <p>The Periodic Table C2.1</p> <ul style="list-style-type: none"> • State some common properties of metals and non-metals. • Use position on the 	<ul style="list-style-type: none"> • State the unit of potential difference. • Name the equipment used to measure potential difference. • Describe the effect of a larger potential difference. • State one difference between series and parallel circuits. • State how current varies in series and parallel circuits • Identify the pattern of current in series and parallel circuits • State the unit of resistance. • Compare simply the resistance of conductors and insulators. • List examples of conductors and insulators. • Describe features of a magnet. • Draw the magnetic field lines around a bar magnet. • State the Earth has a magnetic field • Record the shape of field lines round a magnet. • State the main features of an electromagnet. • State one difference between permanent magnets and electromagnets. • Test the effect of changing an electromagnet. • State some uses of electromagnets. • State the main parts 	<ul style="list-style-type: none"> • Name the minerals required by plants. • State that nitrates are essential for plant growth. • Record measurements of plant growth. • Name an organism which carries out chemosynthesis. • State the energy source for chemosynthesis. • State how the scientific community view the discovery of Chemosynthesis. • State the requirements for aerobic respiration. • Give the name of the process where energy is released in cells. • Explain the uses of the products from anaerobic respiration. • Explain the differences between the two types of respiration. • State the definition of a food chain • State the definition of a food web. • State that one population of organisms can affect another. • State that toxic material can get into food chains. • State that different organisms can co-exist. • State the definition of the term niche. 	<ul style="list-style-type: none"> • State a solution contains dissolved particles. • Describe what happens when a solute dissolves. • Describe how temperature affects solubility. • Name the filtrate and residue in given situations. • State some situations in which filtering is used. • Draw a labelled diagram of the apparatus needed to filter a solution. • State some mixtures that can be separated using evaporation. • State some mixtures that can be separated using distillation. • Label distillation apparatus. • State what happens to mixtures when they undergo chromatography. • Describe what a chromatogram looks like. • Identify the pen used to write a forged cheque by comparing chromatograms. <p>Energy P2.2</p> <ul style="list-style-type: none"> • Identify energy values for food and fuels. • Describe energy requirements in different situations. 	<ul style="list-style-type: none"> • State what is meant by the term variation. • State that variation is caused by the environment or inheritance. • State that there are two types of variation. • State the two types of graphs that can be drawn when representing the two types of variation. • State what is meant by a gene. • State that more than one scientist was involved in discovering the structure of DNA. • State that the different teams of scientists produced different pieces of evidence. • State how survival rates differ for successful adaptation. • State organisms have changed over time, giving examples. • Create a simple evolutionary sequence. • State what is meant by the term extinct. • State how scientist try to prevent extinction. <p>Metals & Acids C2.3</p> <ul style="list-style-type: none"> • Describe what happens when metals react with acids. 	<p>atmospheric pressure.</p> <ul style="list-style-type: none"> • Describe the effects of atmospheric pressure. • State simply what happens to pressure with depth. • Describe characteristics of some objects that float and some that sink. • State the equation of pressure. • Use ideas of pressure to describe familiar situations qualitatively. • State the law of moments. • State the equation to calculate a turning force. <p>The earth C2.4</p> <ul style="list-style-type: none"> • Name the layers of the Earth. • Name the main components of the atmosphere. • Design a simple model of the Earth using information about its structure. • State a property of sedimentary rocks. • Describe simply how sedimentary rocks are made. • State the processes shown by different models of the stages in sedimentary rock formation. • State one difference between igneous and metamorphic rocks. • Describe very simply how igneous and
